- 🏠 New Delhi, India
- in [Satish Pandey](#)

EDUCATION

- ➔ **Bachelor of Computer Applications (BCA)**, Extol Institute of Management, 2014

CORE COMPETENCIES

- ➔ .NET Framework and .NET Core Development
- ➔ SQL Server Management and Optimization
- ➔ Entity Framework
- ➔ ASP.NET MVC Architecture
- ➔ Data Integration Solutions
- ➔ Performance Optimization Techniques
- ➔ Visual Studio IDE Proficiency

CERTIFICATIONS

- ➔ .NET Full Stack with Core .NET
- ➔ Business Analytics Certification Training with Excel
- ➔ Foundations of Project Management
- ➔ Project Initiation: Starting a Successful Project

TECHNICAL SKILLS

- ➔ **Programming Languages:** .NET, C#, SQL
- ➔ **Frameworks and Technologies:** .NET Core, Entity Framework, ASP.NET, ASP.NET MVC, ASP.NET Core MVC, Razor Pages, ORM, JSON, AJAX
- ➔ **Database Management:** SQL Server
- ➔ **Development Tools:** Visual Studio, SQL

OTHER EXPERIENCE

- ➔ **Software Developer** | Atlantis Intelligence Limited | Oct 21 – Apr 25
- ➔ **Executive** | Linkquest Technologies Limited | Jun 19 – Sep 21
- ➔ **Operations Analyst** | Clear Secured Services Pvt Ltd | May 15 – Jun 19
- ➔ **MIS Assistant** | Prasanna Purple Mobility Solution Pvt Ltd | Sep 14 – May 15

PROJECTS

- ➔ Financial Accounting System (ERP)
- ➔ ANTS Airtel Tool
- ➔ Store Management System
- ➔ Office Attendance Web App

JOB OBJECTIVE

To contribute as a **.NET Software Developer**, leveraging nearly **4 years dedicated to .NET technologies**, to develop innovative, scalable, and efficient software solutions that drive business success.

PROFILE SUMMARY

- ➔ **Nearly 4 years of professional experience** in software development with a solid focus on **.NET technologies** since 2021. Skilled in creating robust, scalable, and high-performance applications that meet client requirements across various domains, particularly in telecommunications.
- ➔ Currently serving as a **Software Engineer at American Epay Services Pvt. Ltd.**, where I spearhead the design and development of cutting-edge applications using **.NET Core**, **ASP.NET MVC**, and **SQL Server**, role involves end-to-end project execution, from requirement analysis to deployment, ensuring high-quality deliverables that exceed client expectations.
- ➔ Adept at **analyzing complex business problems** and translating them into effective technical solutions. Proven expertise in building custom software solutions that optimize processes, enhance operational efficiency, and provide a seamless user experience.
- ➔ Strong background in **database management** and data-driven development. Expertise in **SQL Server** and **Entity Framework** for efficient data modeling, querying, and integration, ensuring data integrity and optimized application performance.
- ➔ **Collaborative and proactive team player**, with a history of working closely with cross-functional teams, including project managers, designers, and QA professionals, to deliver successful projects on time and within scope.
- ➔ Committed to continuous learning and professional growth, staying abreast of the latest advancements in **.NET technologies** and software development best practices. Actively pursuing certifications to expand my skill set and contribute to both personal and organizational growth.

WORK EXPERIENCE

Software Engineer | American EPAY services Pvt Ltd (PrismHR) | April-25 – Present

Responsibilities:

- ➔ **Lead Development of Bespoke Software Applications:** Designing and developing customized software solutions using **.NET Core** and **ASP.NET MVC** for clients in the telecommunications industry. Projects include complex data management systems, real-time monitoring tools, and financial reporting applications.
- ➔ **End-to-End Project Management:** Overseeing the entire software development lifecycle (SDLC) from initial requirements gathering to final deployment and maintenance. This involves coordinating with stakeholders, conducting feasibility studies, and defining project timelines.
- ➔ **Advanced Data Integration:** Spearheaded multiple data integration projects using **.NET Core** and **SQL Server**, focusing on consolidating large datasets from multiple sources. Developed custom ETL (Extract, Transform, Load) processes to enhance data quality and availability.
- ➔ **Database Design and Optimization:** Designed and implemented complex database schemas using **SQL Server** and **Entity Framework**, optimizing performance for high-transaction applications. Developed advanced stored procedures, functions, and triggers to support business logic within the database.
- ➔ **API Development and Integration:** Developed RESTful APIs using **ASP.NET Core**, enabling seamless communication between applications and third-party systems. Implemented OAuth2 and JWT-based authentication mechanisms to secure APIs.
- ➔ **Collaborative Development and Code Review:** Actively participate in code reviews, providing feedback and guidance to junior developers to maintain code quality and consistency. Advocate for best practices in coding standards, testing, and documentation.
- ➔ **Performance Tuning and Debugging:** Utilized tools like **Profiler**, **SQL Server Management Studio (SSMS)**, and built-in .NET diagnostics to identify and resolve performance bottlenecks in applications, improving response times and resource utilization.
- ➔ **UI/UX Enhancements:** Collaborated with front-end developers and UX designers to implement responsive and user-friendly interfaces. Leveraged **Razor Views** and client-side technologies like **JavaScript**, **jQuery**, and **Bootstrap** to enhance user experience.
- ➔ **Mentorship and Knowledge Sharing:** Provide training and mentorship to new team members, sharing insights on .NET best practices, coding standards, and project-specific knowledge to promote a collaborative learning environment.
